Dr. Bindu Gulati & Mr. Ted Leeper, Join the Fight Against Poverty & Illiteracy in their Community

Dr. Gulati & Mr. Leeper, Executives and Owners of Downers Dental and Mount Prospect Dental Care have been strong supporters of youth literacy this past year. In addition to providing services to their community through their work, they have spearheaded the charge to improve literacy in their community.

They recognize that literacy is the key to driving a positive future.

They have now taken on another youth group and started sponsoring books for the Boys & Girls Club of America. Here again, ensuring good reading materials are made available in their libraries for afterschool programs.

Their own personal mission aligns with that of the Boys & Girls Clubs, which is to “enable all young people, especially those who need us most, to reach their full potential as productive, caring, responsible citizens.”

They stated, ***“We have decided to take charge in our community. Both of us learned how to read when we were young. We were fortunate to have books in our environment. Not every young person is so lucky. Its our turn to do something about it. Both of us urge every parent, every business owner and everyone to do something about it to ensure our next generation reads. Get on board and help.”*** - Dr. Gulati & Mr. Ted Leeper

The contribution of these two has made it possible for youth in these clubs to read quality works that inspire the imagination and create a love for reading, a great building block for an education.

About: Dr. Gulati is a graduate of Northwestern Dental School Dr. Gulati has been one of Americas Top Dentist's for 2007, 2008, 2009, 2010, 2011, 2012, 2013 and 2014 and also featured on [American Health Front on FOX television](#)
